

METHOD, SYSTEM AND ARTICLE FOR PROVIDING A FAMILY  
TELECOMMUNICATION SERVICE USING AN ORIGINATING DUAL-  
TONE MULTI-FREQUENCY TRIGGER

5

Abstract of the Disclosure

A menu is provided in a telephone call. The menu provides a plurality of destination options including a first destination option for a residence of a family, a  
10 second destination option for a first member of the family at a first location other than the residence, and a third destination option for a second member of the family at a second location other than the residence. A first selection of one of the destination  
15 options is received in the telephone call, and the telephone call is routed to a first telephone number corresponding to the first selection. Thereafter, an originating dual-tone multi-frequency trigger is detected. The telephone call to the first telephone  
20 number is interrupted, a second selection of the destination options is received, and the telephone call is routed to a second telephone number corresponding to the second selection.
